Here is a link to a Google Maps that has been generated by my 3D Map Generator: And here is a link to the 3D Map Generator's website: The 3D Map Generator works with Google Maps, but I can't seem to find a tutorial on how to convert a heightmap to a Google Map. I want to be able to generate a 3D map of the USA or the world that can be imported into Google Maps. Is it possible to generate a 3D map of a Google Map? A: Well, if you read Google Maps API documentation, it says: A WGS 84 heightmap is required. The only information that is required is a bounding box. So, no. A heightmap does not contain the geographic information of the map. The bounding box information, as well as the projection information, is the minimum amount of information required to convert the heightmap into a map. Iran's Revolutionary Guard said that it has captured a U.S. Navy drone that it captured after the U.S. military made an incursion into Iranian waters. The Revolutionary Guard's Qods Force issued a statement on Saturday, saying that it had seized the drone after it was "trespassing" in the Gulf of Oman. It did not specify when the drone was seized. The Guard did not offer any further information on the capture. However, a defense official told Fox News on Saturday that the U.S. Navy was notified of the incident. "The U.S. is aware of the incident and reviewing the situation," the official said. Iran has a long history of seizing ships and stealing other military technology from the U.S. The 1979 Iranian revolution led to an arms race, and subsequent U.S. military action and sanctions, that forced Iran into pursuing nuclear technology, including a uranium enrichment program. While the U.S. has stepped back from some of the more confrontational aspects of the country's policies in recent years, it has kept the
